

Red Hat Cloud Strategy

Peter Hollén

Cloud & IT Transformation Manager Nordics

I.T. CHALLENGES ARE DRIVING AN INDUSTRY TRANSFORMATION

DEMANDS

I.T. EFFICIENCY

DEVELOPER
PRODUCTIVITY

BUSINESS
AGILITY

CUSTOMER DEMANDS
DRIVING CHANGE

TRENDS

CLOUD

IaaS

PaaS

MOBILE

BIG DATA

BUSINESS UNDER PRESSURE

INCREASING EXPECTATIONS AND COMPETITION

LINE OF BUSINESS

Transform to digital business

Deliver services faster at scale with low incremental cost

DEVELOPERS

Deliver applications faster

Speed up code creation and environment updates with modern languages and frameworks

OPERATIONS

Compete with public cloud providers in scalability, reliability, and cost

Public cloud like infrastructure with enterprise management features

CONFLICTING I.T. PRIORITIES

80%

of I.T. budget used for
maintenance and support
of existing infrastructure

Small budget for strategic business initiatives:
LIMITED INNOVATION

SEISMIC SHIFT IN ENTERPRISE I.T.

Driven by IT Consumerization

EXISTING

- Applications with predictable usage models
- Open source perceived as unknown and risky
- Compute-centric infrastructure
- Long innovation cycle
- IT as a cost center

EMERGING

- Dynamic applications that scale to meet demand
- Open source is well understood and widely adopted
- Software-defined infrastructure across compute, networking and storage
- Compressed innovation cycle
- IT as a competitive advantage

“By 2017, 75% of IT organizations will have a bimodal capability”

Gartner

“People shop and learn in a whole new way compared to just a few years ago, so marketers need to adapt or risk extinction.”

**Brian Halligan
CEO HubSpot**

“If everything is under control, you are not moving fast enough.”

Mario Andretti, F1 legend

Bimodal IT = Marathon Runners + Sprinters

Think
Marathon Runner

Mode 1

Mode 2

Think
Sprinter

Reliability	Goal	Agility
Price for performance	Value	Revenue, brand, customer experience
Waterfall, V-Model, high-ceremony IID	Approach	Agile, Kanban, low-ceremony IID
Plan-driven, approval-based	Governance	Empirical, continuous, process-based
Enterprise suppliers, long-term deals	Sourcing	Small, new vendors, short-term deals
Good at conventional process, projects	Talent	Good at new and uncertain projects
IT-centric, removed from customer	Culture	Business-centric, close to customer
Long (months)	Cycle times	Short (days, weeks)

AN IMPORTANT CHOICE

NEXT GENERATION IT IS AT A CROSSROADS

CLOSED

- Innovation limited to a single vendor
- Open source mixed with legacy proprietary tools
- Selective community participation

OPEN

- Open Innovation Model
- Fully Open Source Solution
- Community in DNA

According to the Linux Foundation's Global 2013 Survey, 76% of clouds are built on open source technologies

AN IMPORTANT CHOICE

NEXT GENERATION IT IS AT A CROSSROADS

UN-INTEGRATED

Manual development of operations practices

Complex lifecycle management

Unable to correlate between platforms

INTEGRATED

Proven operations framework

Unified lifecycle management

Deep insight from hardware to apps

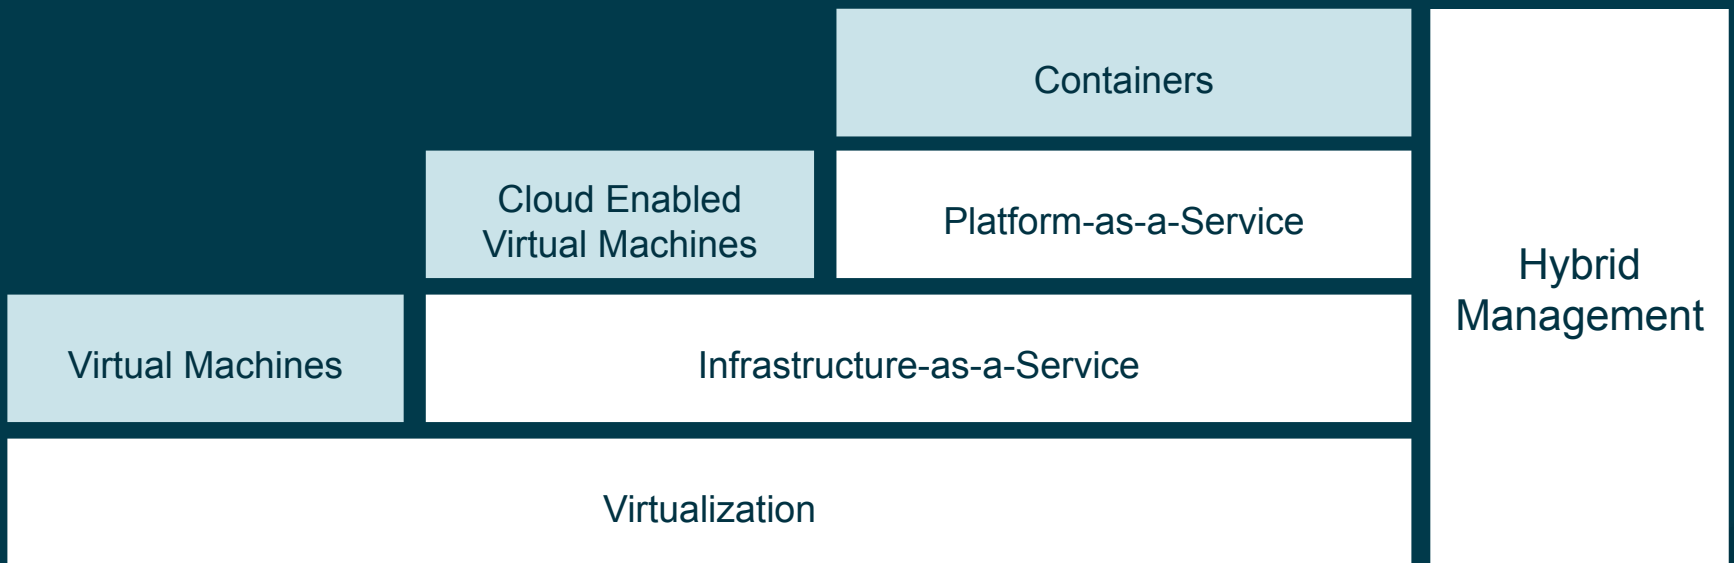

According to Information Week's 2014 Private Cloud Survey, 54% indicated that integrating and protecting their cloud infrastructure is their primary challenge

RED HAT'S VISION: OPEN HYBRID CLOUD

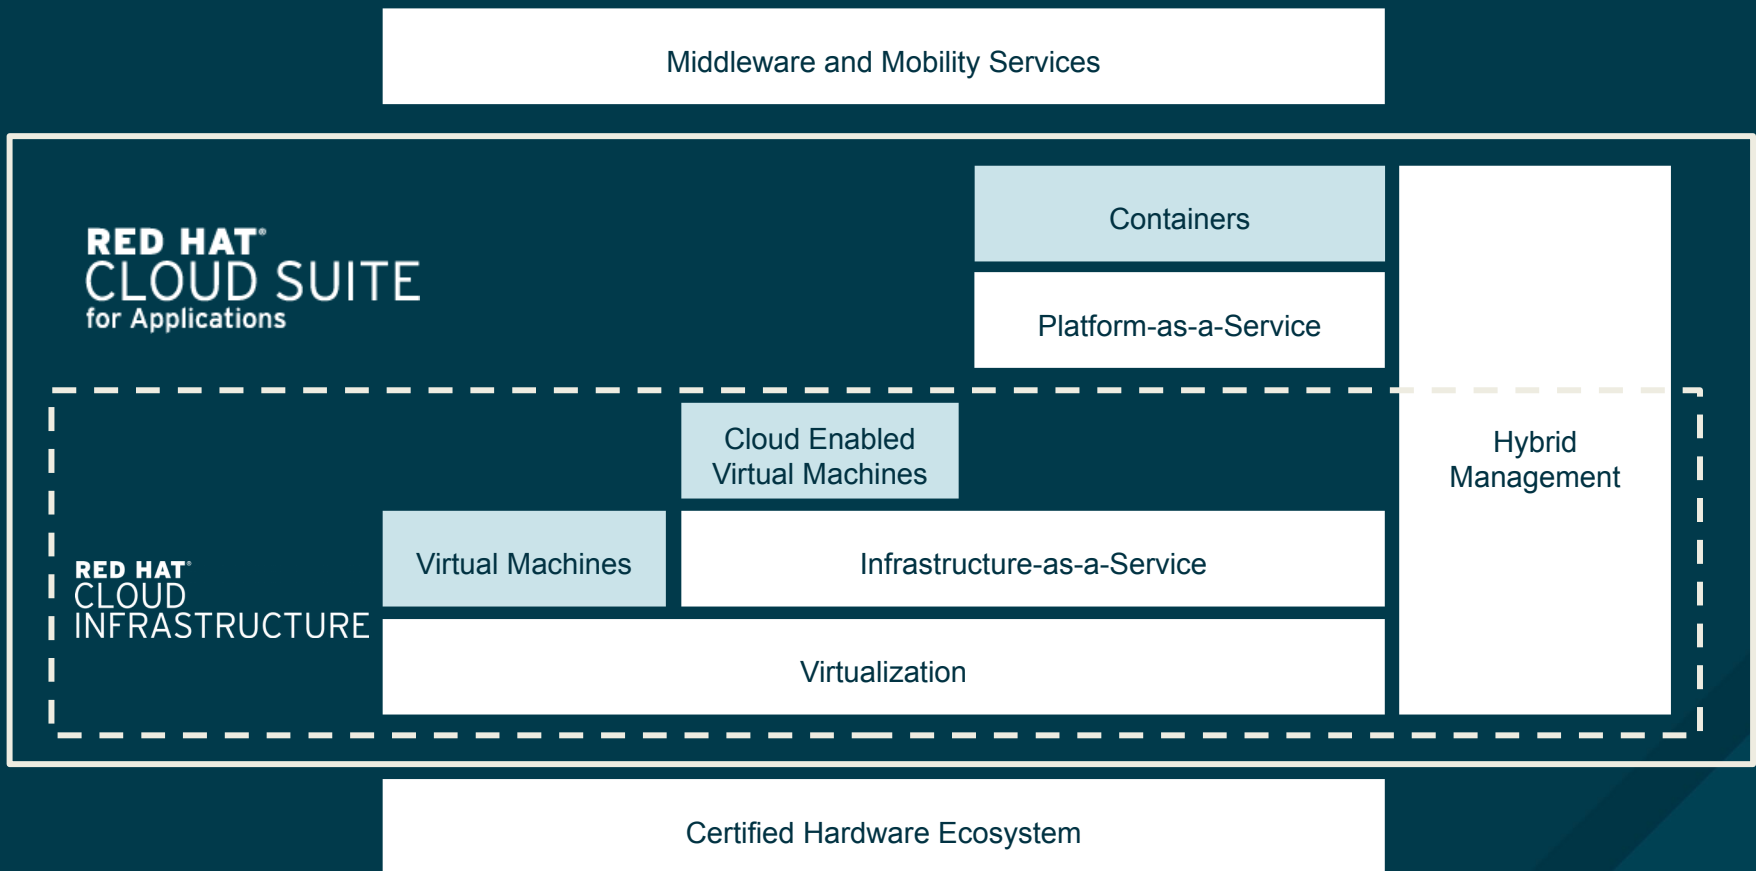

RED HAT CLOUD SUITE FOR APPLICATIONS

FULLY OPEN SOURCE SOLUTION FROM BARE METAL TO APPLICATIONS

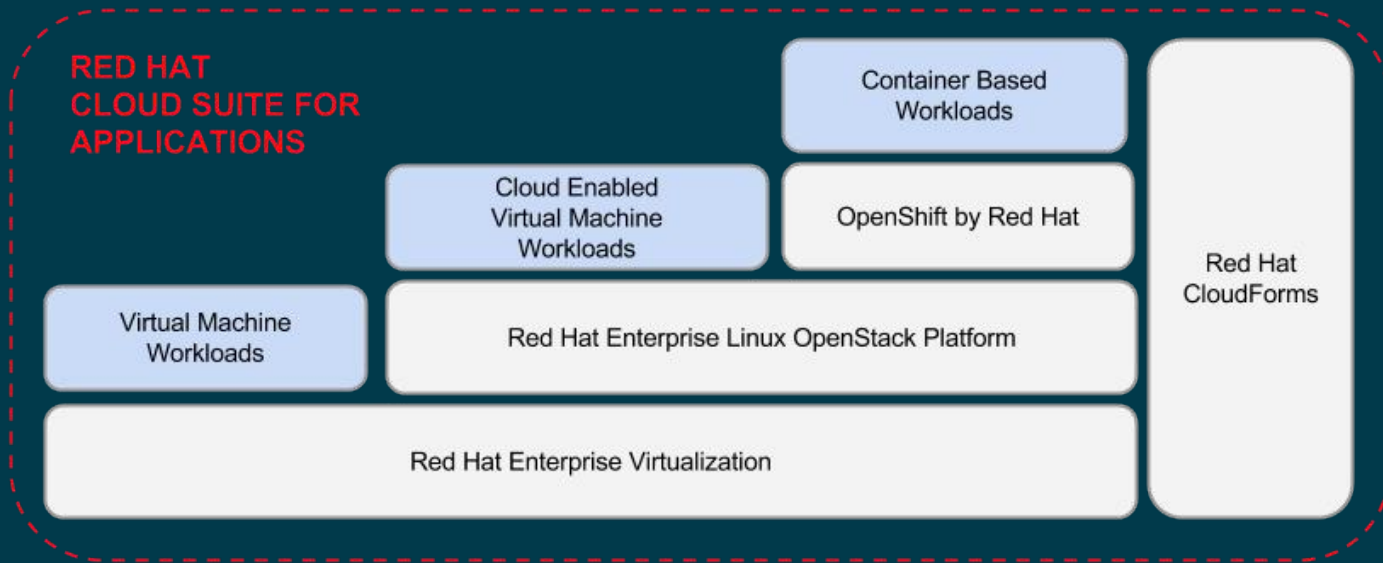

RED HAT CLOUD SUITE FOR APPLICATIONS

BUILDING ON THE FOUNDATION OF RED HAT CLOUD INFRASTRUCTURE

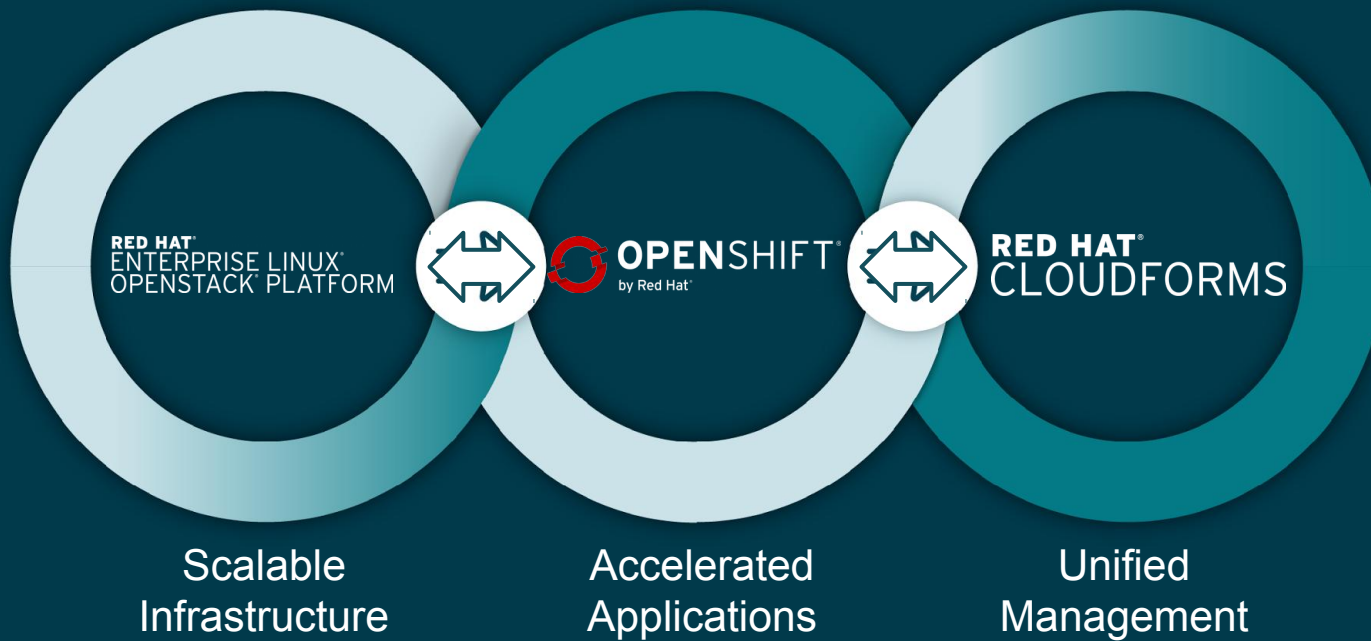

RED HAT CLOUD SUITE FOR APPLICATIONS

RED HAT CLOUD SUITE FOR APPLICATIONS

FULLY OPEN SOURCE SOLUTION FROM BARE METAL TO APPLICATIONS

ACCELERATED APPLICATIONS

OPENSIFT BY RED HAT

- Reduced Time to Value for developing analytic solutions by 70 percent
- Runs FICO Analytic Cloud in hybrid mode using OpenShift Enterprise and OpenShift Online
- Adopting OpenStack for Infrastructure

“Not only are we using OpenStack and OpenShift as the underlying engines for the FICO Analytic Cloud, we’ll be building all of our internal PaaS offers around those two products. Our relationship with Red Hat almost spans our entire portfolio, and is a good example of what we consider value in a vendor. It’s more than a partnership. It’s a shared-goal, shared-vision, shared-outcome relationship where everybody’s in it for exactly the same reason, and mutual goals produce outstanding outcomes.”

Tony McGivern, CIO, FICO

SCALABLE INFRASTRUCTURE

RED HAT ENTERPRISE LINUX OPENSTACK PLATFORM

The Telefonica logo is displayed in a white, stylized script font within a white rectangular box. The box is set against a dark teal background with a decorative geometric pattern of squares in the top-left corner.

RED HAT[®]
ENTERPRISE LINUX[®]
OPENSTACK[®] PLATFORM

- Using OpenStack within Network Functions Virtualization (NFV) Lab
- Defining common framework for Virtual Infrastructure Management (VIM), critical for driving open NFV standards
- Adopting CloudForms within Telefonica to automate deployments across hybrid environments

“For NFV we need to avoid closed and non-interoperable environments, which would hamper its widespread adoption”

Enrique Algaba

Network Innovation and Virtualisation Director

Telefónica I+D-Global CTO

Red Hat acquires Ansible

With Ansible, you can supercharge your Red Hat deployment, bringing Ansible's simple IT automation to all aspects of your business.

Whether it's hooking into Red Hat Satellite to provision and configure your systems with Ansible, using Ansible and Ansible Tower to deploy your applications to OpenShift, or using Ansible's simple automation to deploy, manage, and upgrade your OpenStack cloud, Ansible and Tower work seamlessly in a Red Hat environment to streamline your IT operations and cut your IT costs.

Red Hat acquires Ansible

Ansible's simple automation enables your existing infrastructure to plug-in to OpenShift Enterprise 3 for an end-to-end DevOps environment.
