# Connecting the Customer Company: Salesforce Integration

With Salesforce as your hub for customer data, MuleSoft® provides the necessary links to the rest of your business. With MuleSoft, you can seamlessly connect Salesforce to your other SaaS applications and on-premise software using the Anypoint™ platform, the world's leading cloud and on-premise integration platform. Connect to your ERP and Finance applications in real-time, automate business processes across applications such as SAP, NetSuite, and Zuora, and streamline your marketing tools to drive revenue growth.

Automate Front to BackOffice

Not only connect your front office SaaS applications to each other, but also connect them to your back office on-premise systems to truly have a single view of your customers and your business.

Develop an Agility Layer

MuleSoft's Anypoint Platform affords you the flexibility to easily add new applications and processes to your IT landscape, enabling you to design for tomorrow's problems, not just today's endpoints.

Create Complete Context

SaaS applications bring with them a wealth of data; however, that data can be siloed. To grow your business, you need to break down those silos and ensure complete, consistent data, across all applications, devices and touchpoints.

Connector Portfolio

Leverage MuleSoft's expansive portfolio of out-of-the-box connectors, including SAP, Oracle, Netsuite, Zuora, Aria, Marketo, to connect your Salesforce instance to all aspects of your business.

Battle Tested

Trusted by Salesforce and other best of breed customer companies, MuleSoft's Anypoint Platform has proven enterprise-scale performance and availability.

Build a Customer Database

Quickly import, export, and delete an unlimited amount of data in real-time using MuleSoft's dataloader.io- the #1 app on the AppExchange.
