LATEST NEWS:

## What happens after you open your data to the public?

It is not easy to predict the impact or consequence of opening up your data to the public, neither for the public sector nor for the private. We have listed six important aspects to take into consideration when managing APIs and open data.

Read more about how to manage open data and API's in this blog post (Swedish)

## Why you should prepare for failure...

More than 40 IT professionals gathered to our fourth seminar on agile IT operations and configuration management earlier this month, for those of you that could not attend this seminar, you can now watch a recording of all presentations.

See Simen Graff Jensen and Ørjan Ommundsen talk about the migration of Amedias nearly 80 publications onto one CMS solution, while also improving time to market for new developments, integration to other systems and the overall scalability of the solution.

See Are Romøren from Statens Vegvesen on Cloudifying the Enterprise, and why you should prepare to fail.

We hope we will see you at our next seminar - covering Jan Mark Holzer from Red Hat about the future for the data center and Per Buer from Varnish Software about HTTP-based video streaming with Varnish

Read more and register for above seminar

## Do you want your project to be run by an unskilled team?

Software development is one of the most knowledge-driven industries, yet many Business Managers expect developers to be readily equipped with everything it takes to solve any given problem instantly. Languages and infrastructure keep on evolving. Technical breakthroughs are being made and new techniques and ideas emerge. Which puts great pressure on any development team to stay up to date.

Read more about how to boost developers in this blog post

## Sympa - faster, better, more professional

Sympa, provider of HR tools, are now able to deliver projects with a shorter implementation time and can answer to any integration requirements from customers, which have assisted Sympa in reaching out to customers and improve their business execution speed.

We are able to shorten the implementation time for our projects and deliver high quality HR solutions to any customer", says Juho Valtonen, Product Manager, Connectivity, Sympa

Read more about Sympa and their Mule integration

## Should you really have to wait?

Big changes are awaiting the IT industry and experience tells us that this calls for solutions that can be tested fast and efficiently through a "Proof of Concept", in order to find a technical platform, establish an organisation the can meet the demands of the business and early on create a clear benefit.
