

LATEST NEWS:

Is your organisation API ready?

Last year we launched our API Ready concept in a series of blog posts. The API Ready concept is designed to assist you in every aspect of your API initiative. The topic raises a couple of interesting questions – How do you know if you are API ready and how mature you API initiative really is?

How to survive the digital transformation?

An inevitable question, that needs to be addressed now. The digital transformation will/is taking place whether you like it or not. But how to tackle the challenge? We have gathered a few blog posts and useful tips on the subject.

Videos from our Meetups in Oslo

At our recent Oslo breakfast seminar we learned how Aptoma automates infrastructure with Chef, the payoffs of implementing config management with Puppet and how you can have a Data center infrastructure without IPv4. We are happy to share the videos of the presentations.

How a failure can be the first step towards success

On the importance on having the right set up for the digital transformation and why it is of essence to meet the challenge instead of watching it from a distance. Taking a stand point in the media sector our CEO Anders Liling shares his thoughts.

Preparing for the future with CriseIT

Karlstad University has been granted EU funding to develop tools and methods for crisis simulations and to reduce cross-border barriers for efficient crisis management. The project will last 3 years and will be carried out in close co-operation with a number of organisations and enterprises, where we will act as both co-sponsors and participants in the project.
