LATEST NEWS:

API Readiness - why a scaling strategy matters

Or, the story on how a TV broadcaster manages to serve a handful of users one week and several hundreds of millions the next, through APIs.
To make your API initiative long term successful – you need an infrastructure that supports you and can be scaled up and down based on requirements.

[Read more about API readiness](#) in this blog post (in Swedish)

From shadow IT to empowered IT

Everything today is consumer-driven, therefore enterprises are faced with a barrage of challenges in fully meeting customers' requirements. Learn what shadow IT really means in this aspect and why it is important for an enterprise to move from shadow IT to empowered IT.

9 (+1) ways to be successful with IT automation

IT automation — the kind that is not done by writing one-off scripts, but by using declarative, idempotent code — can measurably improve IT operations workflow and IT's contribution to the business, far beyond speeding up the performance of repetitive tasks.
