LATEST NEWS:

Going beyond borders with the help of integration

In the era of digitalisation, transformation and computer power in the cloud, you need to make sure that your organisation is prepared for all opportunities, threats and other scenarios. The most important capability to support you in creating this ability is an integration strategy and a platform that makes you flexible and ready for rapid responses.

8 ways to benefit from DevOps

The digitalization will require a decreased "Time-to-market" for new ideas. IT turnaround on deliveries will have to go from months to days and if IT can't adopt, business will look for other solutions.

DevOps is one way to tackle the challenge. We have listed 8 ways your business can benefit from using a DevOps model. Can you list them?

Check out the DevOps list in this blog post
