We will [present the concept at Integrate to Innovate](#), May 22nd in Stockholm (an event arranged by Radar)

Configuration Management and DevOps

Come and join us when technology leaders in the media tell us how they ensure that operations and development works as a team, and how they use configuration management and automation to improve quality and lead time, while simplifying and improving how they work.

We would also like to share insights on what to keep in mind when picking among Configuration Management technologies and methodologies. Sounds interesting?

Is traditional ECM ready for a new enterprise?

Enterprise content management (ECM) is in a state of disruption. While content still is king in the enterprise, content types and the places that content needs to travel to enable business processes have changed dramatically. Alfresco founder and CTO John Newton has written a whitepaper on the subject.

[Download the white paper: Next Generation ECM](#)

On April 24th, you can attend a webinar that will give you ideas on how to combine content and processes in new and innovative ways.
