### *Scania TeamRoom - a global co-operation arena*

**SCANIA**

In order to create new business opportunities and profitable co-operations handling digital assets is becoming more and more important.

This is something Scania has taken to heart. Through their project TeamRoom they have created a digital co-operation platform, making it possible for their personnel to quickly and easily access an arena where they can meet and work, irrespective of where on earth they are situated.

### *Lantmäteriet - API management for public data*

By using APIs Lantmäteriet will be able to share data in a controlled way and at the same time reach new channels that are only communicating with Lantmäteriet digitally. Even if using APIs makes it easier for Lantmäteriet to communicate open data to its target group, there are still requirements for it to be done in a secure manner. This is why Lantmäteriet decided to implement an API Manager for their APIs.

### *Why failure can be the first step towards success*

All companies have to digitalise or else watch their competition pass by, but the transformation is tricky and initiatives may turn out the wrong (costly) way. It is a narrow path to walk, balancing challenge, speed, innovation, budget and more. So how to handle the process, make the path a bit wider? To go for it but at the same time minimise the number of mistakes? Anders Liling, CEO at Redpill Linpro, gives his thoughts on the subject in a blog post.
