LATEST NEWS:

Bimodal integration - are you taming the digital dragon?

Today's world moves quickly as does the development of new ideas and solutions. Demands are focused on "time-to-market" and an increased responsiveness. Gartner calls this "the taming of the digital dragon" and in order to successfully tame this dragon, Gartner believes we need to accomplish three things at the same time:

- Maintain the core of our internal operational/legacy systems
- Show strong leadership
- Acquire bimodal integration capacity

Are you bimodal integrated? Read more about bimodal integration in this blog post (in Swedish) or download our bimodal integration presentation

Integration, APIs and PostgreSQL = Meetup

Join our meetup "Integration, APIs and PostgreSQL" in Oslo June 12th, targeted at IT Managers, CIOs, system administrators, system architects, developers, DevOps, DBAs, infrastructure consultants and others interested in Integration, APIs, DevOps and agile operations. We will show real life examples on how a modern Open Source based integration platform have been implemented to smoothen cruizing in the shipping industry, how APIs might revolutionize the world of connectivity with fake world examples and the new and hottest stuff from the world of PostgreSQL. From the agenda:

- Porting your integration infrastructure to a new platform - a Color Line cruise
- Top 5 reasons for API Management together with a fake world example on the benefits
- What is new and cool in PostgreSQL

Seven document management boxes to tick in order to improve your organisation

On the 28th of January 1989, NASA's Challenger space shuttle exploded 73 seconds into its tenth flight, killing the seven people on-board. Although an 'O-ring', was the direct cause of the accident, the following investigation established that NASA's organizational culture had been a major contributing facto. A tragic and costly information disaster.

Simply put, not finding information at the right time can be costly – but how costly? Even if most of us don't risk crashing a space shuttle, we are still affected by information disasters.

Read this blog to learn which boxes you need to tick or read this blog post to learn more about Alfresco ECM

10 Open Source Myths Debunked

In 1943 Thomas Watson, chairman of IBM famously said he thought there would be a world market for maybe five computers. With this in mind, history clearly shows that predictions can be wrong and that new ideas are often questioned and mythicized.

For instance we now know that Thomas Watson's prediction was slightly… off the mark and this shows us the importance of facing and challenging preconceived ideas and opinions.

Below are ten of our favourite Open Source concerns that still persists and what we think about them:

- Part 1 Debunking Open Source Myths
- Part 2 Debunking Open Source Myths
- Part 3 Debunking Open Source Myths

Events

Redpill Linpro is attending and hosting various events, including:

Alfresco Collaborationseminar, Copenhagen, May 28th

Integration, APIs and PostgreSQL meetup, Oslo, June 12th

eFörvaltningsdagarna, Stockholm, 8-10th October
