

LATEST NEWS:

Are you API Ready? Your steps for success

API Economy is the talk of the town at the moment. And no wonder. Through API Economy we are introduced to phenomena such as API led Connectivity, API Management and API Strategies. And as often with new technical progress we find a lot of people talking about it but not understanding how it will affect us and our businesses. So what does it actually mean?

How to survive the digital transformation

This might sound like a strange question, since you, most probably, will not survive at all if you do not make the transformation. But how are we to deal with legacy systems, understand the ROIs and to prepare for the transformation?

Information disaster risks, and how to spot them

Our society is hugely information based – we create and manage products and services which are dependent on the right person having the right information at the right time. In other words, information-related disasters are an increasingly real threat to organisations today. There are several kinds of 'information disasters' - some are caused by the wrong information, others by out-of-date information and some quite simply by too much information.
