

Anypoint Integration Platform for Healthcare and Life Sciences

Healthcare and Life Sciences organizations are leveraging technology to radically transform healthcare. Providers are extending the point of care beyond the four walls of the hospital ward, and health insurance companies are moving from passive payers of claims to active managers of their policyholders' lifestyle.

These transformations demand a new level of connectivity. To thrive in this new era, healthcare organizations must seamlessly integrate data, applications and processes across clinical and non-clinical systems, both on-premise and in the cloud.

MuleSoft's Anypoint Platform is helping leading organizations throughout the healthcare ecosystem, from government agencies to local pharmacy providers, to improve patient outcomes and reduce costs by connecting systems, data sources, and people.

Anypoint Integration Platform for SOA

- Web services
- Service orchestration
- SOA governance

Anypoint Integration Platform for SaaS

- App connectivity across on-premise and the cloud
- Real-time data integration
- Hybrid security

Anypoint Integration Platform for APIs

- API management
- API gateway
- Developer portal

“ We were not only able to implement a state-of-the-art architecture in a short time frame, but also define the foundation for the future growth of our company and its IT system landscape.”

Enterprise Architect, Fortune 50 company

“ We are a 24x7/365 shop where high availability is critical, along with scalability to volumes that start with tens and hundreds of transactions per second and grow from there.”

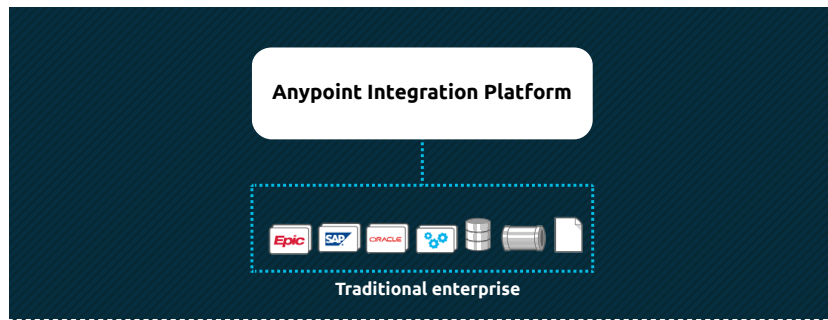

Principal Architect, Fortune 250 company

Leading healthcare and life sciences organizations trust MuleSoft for mission critical applications

Anypoint Integration Platform for SOA

Case study: Fortune 100 Pharmacy Benefits Provider

Challenge

Rationalise IT architecture after series of acquisitions

Solution

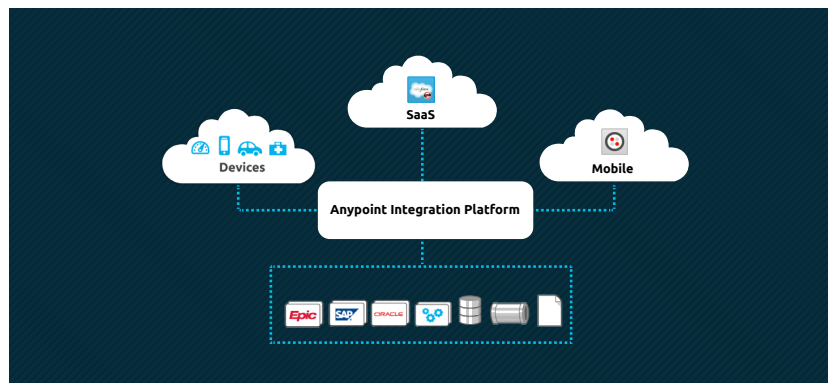

Leverage Anypoint Platform to create shared services layer and unify data and processes

Benefits

Increased agility to respond to business needs and reduced operational expense through removing duplicated initiatives

Anypoint Integration Platform for SaaS

Case study: Top-5 US Healthcare Provider

Challenge

Deliver two-way, real-time collaboration across patient care teams

Solution

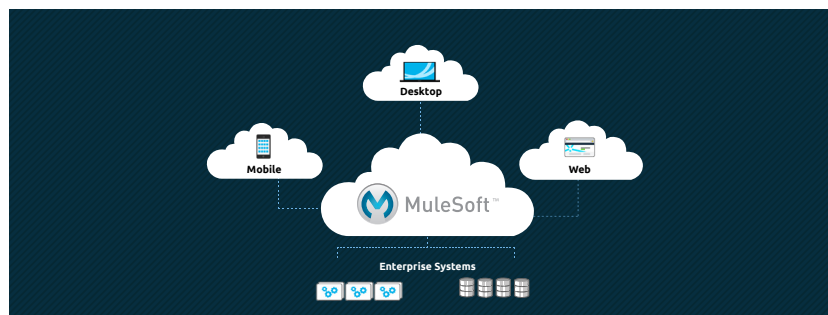

Anypoint Platform as backbone connecting clinical and non-clinical applications, across on-premise, cloud and mobile applications

Benefits

Enrich patient care team communications and reduce costs through eliminating need for paging devices

Anypoint Integration Platform for APIs

Case study: Top-3 Global Pharmaceutical Company

Challenge

Provide secured access to data distributed across disparate legacy systems, global desktop, web and mobile platforms

Solution

Anypoint Platform as API services layer, connecting doctors with clinical information stored in backend systems

Benefits

Replace multiple point-to-point integrations with API-first approach

MuleSoft is used in production by thousands of enterprises, including Walmart, MasterCard, Nokia, Nestlé and Honeywell, and powers integrations with leading SaaS vendors such as Salesforce.com, NetSuite, Workday, Intuit and Zuora.
